

**Connexys Human Capital Solutions selects ACTONOMY for its new generation HR searching & matching.**

**Ghent, Belgium - Rotterdam, The Netherlands - August 22nd, 2008**

**Connexys Human Capital Solutions, based in The Netherlands and supplying a world wide customer base with Recruitment and Management Development solutions selected Actonomy xMP® out of three suppliers as its new search & match technology supplier.**

Connexys Human Capital Solutions has selected Actonomy xMP as its search and match technology supplier to be integrated in the total suite of human capital solutions. Connexys offers recruitment-, campus recruitment, and management development solutions for corporate organisations, recruitment agencies and the government. The urgent inquiry from its market to search and match data in all possible forms has driven Connexys to select specialised technology to replace the traditional database query techniques. Actonomy xMP will perform the searching & matching of criteria, as well as matching complete candidate profiles with vacancies at once.

"Connexys Human Capital Solutions is an important player in the HR market. The request was initially to replace the Google Enterprise Search by Actonomy xMP Search" says Filip De Geijter, CEO Actonomy. "After having studied the complete range of features Actonomy xMP offers, Connexys deployed the full range of HR search & match features in its application, making it a much more powerful tool for recruiters."

"After a selection of three players in the matching market we selected Actonomy as our partner. Their knowledge of the HR market, their professional behaviour and the flexibility of their application was exactly what we needed", says Gijs van Heijst, CEO of Connexys.

**ABOUT CONNEXYS**
